

Cochran Hot Water Boiler

HW29 Series

The Cochran HW29 series of compact hot water boilers has been developed to meet today's demands for higher operational efficiencies and lower emissions. Built to the latest harmonised European codes, the HW29 series utilises cutting edge combustion and control equipment. The fully wet back design provides industry leading levels of efficiency and low NOx emissions. Available as the HW29 LT for low temperature hot water applications, built to EN14394 and the HW29 HT for medium and high temperature applications, built to EN12953. The wide range of outputs from 450kW to 4.1MW provide energy saving, low emission solutions for all commercial and industrial applications.

Output: 450 kW to 4100 kW.

Maximum Working Pressures: 6.0 Bar, with designs available up to 10.0 Bar.
